(57) **ABSTRACT**

A cover for a food container includes a first cover piece and a second cover piece. The second cover piece is hingably and releasably coupled to the first cover piece so that the first cover piece and the second cover piece are separable from one another. At least one tab extends laterally away from at least one of the first cover piece and the second cover piece, and is engageable by a user to lift an end of the at least one of the first cover piece and the second cover piece.
